

Sustainable Company Profile

Additional Information

Lebenskleidung

Our fabrics' GOTS certification and our own personal standards ensure the quality of our fabrics. We maintain our GOTS quality through regular visits to our manufacturing partners, during which we closely examine the conditions of production in order to come to our own understanding of the manufacturing process.

We are always open to questions regarding our quality standards!

Our primary objective with regards to the quality of our products is to meet your wants and needs. For us, this means offering:

- consistently high-quality fabrics
- fabrics that are available when you want them
- reliable delivery
- quality service

In addition to our quality control of our manufacturers on location, we also closely inspect the quality of our products here in Germany. Every fabric roll we receive is examined atop a light table, which allows us to guarantee that every meter of fabric we sell is of the highest quality.

Here at Lebenskleidung, constant improvement is a crucial part of quality assurance and it is important to us that you continue loving our fabrics. To this end, we continuously strive to optimize our service and offer fabrics that meet your wants and needs. We are always happy to hear your ideas, requests, and suggestions for improvement!
